

Solar Modules

Photovoltaic Modules for Aids-to-Navigation. These high performance modules are developed and optimized for off-grid photovoltaic systems. The modules have a proven record in hundreds of AtoN installation from arctic to tropic conditions. They have a high reliability in harsh marine environments.

Description

[Features](#)

Solar Modules features:

- Long-life industrial quality design
- Stable frame construction
- Stable aluminium frame with mounting and grounding holes
- Carefully selected polycrystalline solar cells to reach top performance
- Wired in bypass diodes to reduce potential loss of power and damage from partial array shading
- Junction box with installation friendly cable fittings
- Designed to meet the environmental requirements of IEC61215
