

VLL43

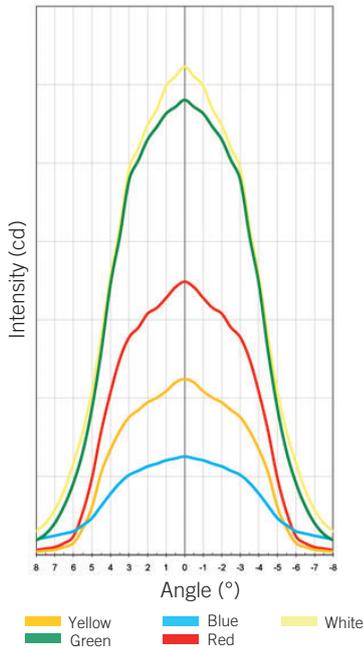

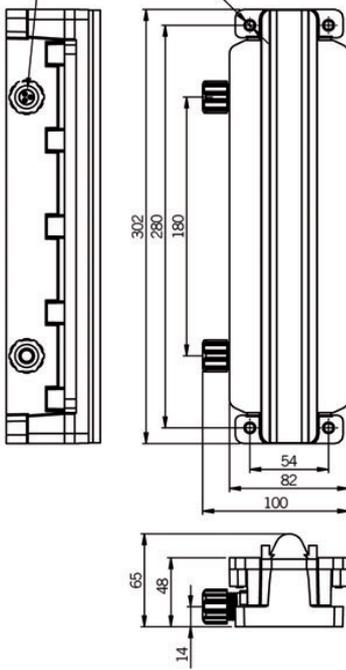

0,8 NM to 11,7 NM @ 0.74T

The VLL43 Linear Lead Light is powerful unidirectional light ideal for marking short ranges and obstacles. The optical system utilises an acrylic lens to capture and project the light from the high-powered LEDs. The LEDs are precisely graded and placed to produce a light beam with minimum variation in intensity. Any number of these lights can be used to achieve the desired range. Each unit has its own control board and can be operated individually.

- Separate intensity settings for day
- Nine night/day transition settings
- Up to 246 standard flash characters
- Range 17,1 NM by night and 0,9 NM by day @ 0,85T
- One programmable custom character
- Wired synchronisation with options of master/slave
- Sync delay from 0.1 to 9.9 seconds
- Battery low voltage cut off
- Optional PIN code for programming
- External GPS synchronisation using the VSU-29 unit
- Automatic Schmidt-Clausen correction for intensity
